

Shawn Caldwell

Shawn graduated from Bible College with a B.A. in Education. He has been providing construction services for the past 15 years, from conceptual estimating to value added engineering and design-build services for many projects and clients. In addition, Shawn has the ability to recommend an appropriate prefabricated metal building if it is applicable for your project.

Projects include:

Advanced Bionics, St. Jude Medical Center, MANNKIND Facilities, and Mann Biomedical Park Corporation (all of which required attention to critical components, such as clean rooms, and laboratory testing space) HRL Laboratories, William Morris Chevrolet, Easton Sports Corporation, Encino Towne Center, Biola University, In His Presence Church, among others.
